CEO'S COMMENT

Positive progress in property advisory services and fund management

After a weak start to the year, Catella is reporting improved profit for the second quarter. The improvement applies to both operating segments, Corporate Finance and Asset Management.

Corporate Finance, which mostly consists of transaction advisory services for the property sector, returned to positive earnings, with more transactions completed than in the second quarter of the previous year. Transaction activity on the property market has been inhibited by uncertainty regarding economic progress in Europe, but a number of indicators now suggest increasing transaction volumes.

In Asset Management, the fund operations in Germany and Sweden are con-

tinuing to perform well with healthy net inflows of capital and good profitability. In the second quarter, net inflows to the German property funds were SEK 0.8 Bn, and to the Swedish equity, head and fixed income funds, net inflows were SEK 1.0 Bn.

Simultaneously in this quarter, the operating segments were charged again with expenses for initiatives conducted in the banking operation. This included actions in IT to build higher capacity and infrastructure, as well as adapting operations to new regulatory structures. The banking operation reported a loss of SEK 9 M for the second quarter, and SEK 27 M for the first half-year. Initiatives in the banking operation will continue to be charged

to profits in the year, but are necessary for us to be able to create a cost-efficient wealth management operation, and to develop the earnings potential within card and payment services.

The search and selection for my successor as CEO and President of Catella is now complete. Personally, I feel very sure that Knut Pedersen is the right person to keep developing Catella in operational and profitability terms.

Goals for 2013

The overall business goal for 2013 is to strengthen Catella's presence on the major European markets in Corporate Finance and to build a competitive offering in Asset Management. Through the breadth of its business and geographical coverage in Europe, Catella has good prospects of securing strong and profitable positions on selected markets segments across Europe.

Risks and uncertainties

Catella is affected by progress on the financial markets. The Corporate Finance operation is affected by the market's willingness to execute transactions, which in turn, is determined by the macroeconomic environment and the availability of debt finance. Asset Management is affected by market progress on Nordic stock exchanges and progress on the property market.

The decision to retain and integrate the banking operation with Catella's other

operations is associated with operating risks and restructuring risks.

The preparation of financial statements requires the Board of Directors and Group management to make estimates and judgments of the value of loan portfolios, goodwill, trademarks and brands, as well as assumptions concerning revenue recognition. The estimates and judgments affect the Consolidated Income Statement and financial position, and disclosures on contingent liabilities, for example. See Note 4 in the Annual Report 2012 for significant estimates and judgments. Actual outcomes may differ from these estimates and judgments due to other circumstances or other conditions.

Methods and assumptions for cash flow projections and discount rates

The cash flow for each loan portfolio is presented in the table on the next page and the discount rates by portfolio are stated above. There is more information on Catella's loan portfolio on its website.

Cash flow projections

The portfolio is valued according to the fair value method, as defined in IFRS. In the absence of a functional and sufficiently liquid market for essentially all investments and comparable subordinated investments, valuation is performed using the mark-to-model method. This method is based on projecting cash flow until maturity for each investment with market-based credit assumptions. The credit assumption used by investment advisor Cartesia is based on the historical performance of each investment and a broad selection of comparable transactions. Projected cash flows include assumptions of potential known weakening of credit variables. They do not include the full effect of a scenario of low probability and high potential negative impact, such as dissolution of the eurozone, where one of the countries in which EETI has underlying investments leaves the European Monetary Union, or similar scenario.

Cartesia believes that these credit assumptions are reasonable and equivalent to those applied by other participants on the market. Projected cash flows were prepared by Cartesia using proprietary models. These models have been tested and improved over several years and have not shown any material discrepancy with models used by other participants on the market. Adjustments of cash flows affect this value and are stated in a sensitivity analysis on Catella's website.

Discount rates

The discount rates applied are set internally, and based on a rolling 24-month index of non-investment-grade European corporate bonds as underlying assets (iTraxx). The discount rates per portfolio are also set relative to other assets in the absence of market prices for the assets held by EETI. Each quarter, the Board of EETI evaluates the projected cash flows and related assumptions, combined with the market pricing of other assets for

possible adjustment of the discount rates in addition to variation of the index. Adjustments to discount rates affect this value and are stated in a sensitivity analysis on Catella's website.

Risks and uncertainties relating to loan portfolios

Most of the investments consist of holdings in and/or financial exposure to securities that are subordinate in terms of payment and are ranked lower than securities that are secured or represent ownership of the same asset class. Some investments also include structural features by which more highly ranked securities that are secured or represented by ownership of the same asset class are prioritised in instances of default or if the loss exceeds predetermined levels. This could result in interruptions in the income flow that Catella has assumed from its investment portfolio. For more information, see Note 24 in the Annual Report for 2012.

In accordance with IFRS 7, financial instruments are recognised on the basis of fair value hierarchically with three different tiers. Classification is based on the input data used for measuring instruments. Quoted prices on an active market data on the reporting date are applied for tier 1. Observable market for the asset or liability other than quoted prices are used in tier 2. Fair value is determined with the aid of valuation techniques. For tier 3, fair value is determined on the basis of valuation techniques based on non-observable market data. Specific valuation techniques used for tier 3 are the measurement of discounted cash flows to determine the fair value of financial instruments. For more information. See Note 3 of the Parent Company's Annual Accounts for 2012.

Note 7. Disclosure regarding Catella's acquisition of participations in IPM Informed Portfolio Management AB

As a stage in the development of Catella's asset management operation, in November 2011, Catella became a shareholder of IPM Informed Portfolio Management AB, through the acquisition of a shareholding of just over 5% of IPM's Dutch holding company. In November 2012, Catella increased its ownership from 5% to 25% of IPM Informed Portfolio Management AB through a SEK 33 M private placement. This new share issue is conditional on ownership assessment approval. The Swedish Financial Supervisory Authority granted approval of the transaction on 10 April 2013.

IPM is a leading provider of systematic investment services in discretionary management and fund management. IPM currently has assets under management of SEK 42 Bn on assignment from major institutional investors, pension funds, insurance companies and founda-

tions. The shareholding in IPM creates opportunities for Catella to consolidate its position as a finance group.

The acquired operation, which will be part of the Asset Management operating segment, has been consolidated into the Group according to the equity method from 10 April 2013, and accordingly, did not contribute to sales or profit in the first quarter 2013. As of 1 April, the fair value of the acquired net assets of IPM was SEK 33 M. If the acquisition had been conducted as of 1 January 2013, the Group's operating profit/loss would have been SEK -26 M. This amount has been computed by applying the group's accounting principles, and restating associated company profit/loss, so this includes additional amortisation that would have been made if a fair value adjustment of intangible assets had been made as of 1

January 2013, as well as the resulting tax consequences.

The total purchase price for 25% of the participation of IPM announced to SEK 50 M and has been financed with internally generated funds through a cash payment, of which SEK 33 M affected the Group's cash and cash equivalents in the second quarter 2013. In addition, Catella incurred acquisition-related expenditure of SEK 0.6 M, which was charged to operating profit/loss for 2012.

The goodwill of SEK 17 M arising through the acquisition relates to operational expansion, human capital and the synergy effects expected to arise through coordination with the Group's existing asset management operations. No portion of reported goodwill is expected to be deductible for income tax purposes.

Net assets relating to the acquisition as of 1 April 2013 are as follows (SEK M):

Acquisition-related intangible assets	14
Other net assets acquired	19
Fair value of net assets	33
Goodwill	17
Total consideration	50

The fair value of acquired identifiable intangible assets of SEK 14 M, relating to portfolio management systems and client relationships, is preliminary in anticipation of definitive measurement of these assets, scheduled within 12 months of the acquisition date.
