

# KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Catella Sverige Hållbart Beta, unit class A SEK, retail class  
ISIN-code: SE0000577272

Catella Fondförvaltning AB, corporate registration number  
556533-6210.

## OBJECTIVES AND INVESTMENT POLICY

The Fund is an index tracker fund that aims to track the average performance on the Stockholm Stock Exchange based on the SIXRX index. The Six Return Index (SIXRX) shows the average performance on the Stockholm Stock Exchange, including dividends. Fund assets are invested according to the weights of the various companies in this index while taking into account sustainability criterias. Fund assets may not be invested in companies that violate any of the ten principles of the UN Global Compact, read more about the principles for sustainability on [www.catella.com/funds](http://www.catella.com/funds).

The fund's investments are primarily in Swedish equities and equityrelated transferable securities but the fund may also invest in derivatives as part of its investment strategy. The fund does not invest in unlisted securities. The fund's focus on equity investments means it has a higher level of risk while the investor has the possibility of good valuegrowth.

The fund will pay no dividend.

The fund is normally open for purchases and sales of fund units on every banking day

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 6 years.

## RISK AND REWARD PROFILE

The risk and reward indicator illustrates the link between risk and potential returns from an investment in the fund. The indicator is based on how the fund's value has changed over the past five years.

This fund belongs to category 5, meaning a medium risk of rises and falls in net asset value per unit. Category 1 does not imply that the fund is risk-free.

Over time, the fund's risk indicator can change both upwards and downwards. This is because the indicator is based on historical data, which is not a guarantee of future risk/reward.

The fund invests in companies listed on stock markets, which are generally associated with a high level of risk but also the potential for high returns.

The indicator mainly reflects the ups and downs in the value of the shares in which the fund invests. Since the fund makes its investments concentrated in a single country the fund has a higher risk than a fund that distributes holdings across several countries.

The indicator illustrates the key risks in the fund, but does not take into account the following:

*Operational risk* – the fund may suffer losses due to inadequate or failed procedures, human error, systems failure or external events.

*Liquidity risk* - the fund has a few illiquid position but in case of large redemptions in the fund such position may need to be sold to a lower price and cause losses in the fund.

## CHARGES

### One-off charges taken before or after you invest

Entry charge:	None
Exit charge:	None

This is the maximum that may be taken out of your money before it is invested.

### Charges taken from the unit class over the year

Ongoing charges:	0,62 %
------------------	--------

### Charges taken from the unit class under certain specific conditions

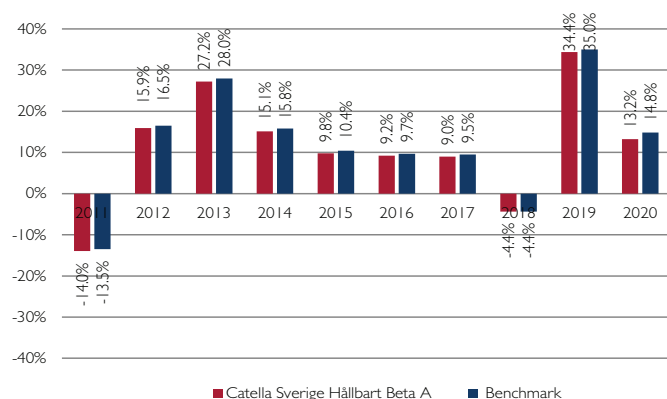

Performance fee:	None
------------------	------

The charges you pay are used to pay the costs of running the unit class, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

Information on current charges can be obtained from your sales agent.

The ongoing charge figure is based on expenses for the previous calendar year. This figure may vary from year to year.

## PAST PERFORMANCE

The performance of the unit class (return) is calculated after deduction of ongoing charges. No adjustment has been made for any entry and exit charges. The value for all years is calculated in SEK and with dividends reinvested in the fund.

Past performance is no guarantee of future performance.

The unit class was started on 2 October 1998.
